

Dynamelt™ D Series - Adhesive Supply Unit

Dynamelt D Series is available in four hopper sizes and with a choice of dual or single gear pumps. The ASU uses a microprocessor temperature control to closely control the temperature of hot melt adhesive for up to eight hose standard and precision metered outputs.

Dynamelt™ D Series:

- Up to four drives/four gear pumps permit up to eight metered outputs.
- Standard or precision metered outputs available.
- User friendly push icon-driven controls with multi-lingual display.
- Dynacontrol™ P.I. digital temperature controller with platinum sensor accuracy.
- Ten combinations of hopper sizes and melt rate selections.

Simplicity

Icon-driven control panel simplifies operations.

Flexibility

Can accommodate up to four standard hoses/heads.

Reliability

Melt-On-Demand hopper extends adhesive life and performance.

The Dynatec Difference...

Melt-on-Demand Hopper

Most suppliers will agree that adhesive degradation is the number one cause of downtime on hot melt equipment. To address this problem, ITW Dynatec has patented a "Melt-On-Demand" system. ITW Dynatec's vertical, unheated hoppers only melt the amount of adhesive required by the application. Most of the hot melt adhesive in the hopper remains at a

much lower temperature, perhaps even solid state. The added benefits of melting only the adhesive required are quicker start-ups, reduced energy costs, better viscosity control, and reduced fumes.

Optional Accessories

- High accuracy gear pumps
- Adhesive low level indicator
- Digital RPM readouts
- KBSI signal isolator
- Ethernet communications
- Analog or digital adhesive pressure indicator
- Pendant control
